

Overview

The Lift King MB450 is a quality built general-purpose motorbike hoist that will easily accommodate most motorbikes on the market with a 1000lb capacity

With your choice of either manual hydraulic foot pump or pneumatic models, its standard features include an extendable front wheel chock, a removable rear panel for back wheel work, several tie down loops for stabilizing your bike on the hoist and castor wheels for portability.

The MB450's also come standard with a 500kg jacking beam to get your bike completely off the platform for all-round service work.

A striking 2-tone grey and black gloss powder coated finish with a diamond plate non-slip design and a big 2000mm platform length makes this bike hoist the perfect piece of equipment for service, maintenance, cleaning or bike shows and display.

Features
