

Product Brochure  
Lift King MC-600 Motorcycle/ATV/Quad Bike Lift

## Overview

The Lift King MC-600 is a professional electronic motorcycle and ATV lift with a 600kg capacity.

Optional width and length extension plates can be fitted to service ATV and Quad Bikes.

Standard equipment is a super wide 410mm extendable front wheel chock, removable plate for rear wheel service, 500kg lifting jack and a heavy-duty set of stability tie down straps.

The electronic control box directs the hydraulic ram to effortlessly raise and lower the lift and activate and disengage the automatic safety locks.

With a comfortable lifting height of 1090mm and a fully electronic control system the Lift King MC-600 proves its user-friendly versatility for anything on 2, 3 or 4 wheels.
